PROJECTS

• Quotes Generator App

Built a dynamic web application that fetches and displays inspirational quotes using a public API. Users can generate new quotes at the click of a button. The app features a clean, responsive UI and provides a smooth user experience. Developed using HTML, CSS, and JavaScript, with efficient API integration for real-time quote generation.

• Care Care Website

A simple, static Car Care Website built as a beginner front-end project. This site is crafted using only HTML for content structure and basic CSS for all styling and layout. No JavaScript was used.

• Food Delivery Application (MERN Stack)

A modern, responsive, and feature-rich food delivery platform designed to make online ordering seamless for users and powerful for admins. | Scalable backend architecture with MongoDB | Secure authentication using JWT & bcrypt | RESTful APIs with Node.js & Express.js | Interactive frontend with React.js & state management | Secure payments via Stripe | Search & filter for smart restaurant discovery | Live deployment with real-world accessibility | MongoDB | Express.js | React.js | Node.js | JWT | Stripe
